

Tasks

All the tasks given below are in reference to the following dashboard

<https://sellerfusion-qa-test.vercel.app/>

01. Come up with a QA strategy and a QA plan for testing the given Dashboard
02. Come up with all the testing flows that can be automated.
03. In this screen

Total fulfilled quantity is equal to the sum of below metrics

- Available
- Transfer
- Inbound
- Unfulfillable
- Researching

Total = Available + Transfer + Inbound + Unfulfillable + Researching

And also, Total of unfulfilled quantity is equal to the sum of below metrics

- Customer Damaged
- Defective

Total = Customer Damaged + Defective

Build an automation script to validate calculations in the front-end as well as data coming from the API. (Note: Automation should be done using cypress, TypeScript. Submit your project via GitHub repository)

04. Go through the dashboard and report all the bugs you can find in a detailed Bug report.
